Professional Home Health Services Unites Under One Name to Better Serve Southern Nevada Families

LAS VEGAS, NV — After more than 30 years of delivering trusted in-home care across Southern Nevada, two long-standing care programs — Professional Healthcare Staffing and AulTru — have now united under one simplified name: Professional Home Health Services (PHS).

While the name may be new to some, everything that matters remains the same — same people, same leadership, same mission of compassionate, high-quality care at home.

"Our community knows us — they know our caregivers, our nurses, and our commitment to families," said Joe Struck, CEO of Professional Home Health Services. *"This name change is not about changing who we are. It's about making it easier for the community to understand that we are one strong, unified team — ready to serve."*

Professional Home Health Services offers a full spectrum of skilled and non-skilled in-home care services, including advanced nursing, therapy, personal care, and specialized support for Veterans and individuals living with catastrophic injuries. PHS is an authorized provider through the VA Community Care Network and a preferred provider of the CareScout Quality Network, underscoring its dedication to clinical excellence and person-centered care.

Built on a foundation of compassion, commitment, and community, PHS has earned the trust of hospitals, physicians, Veterans' groups, and thousands of local families. The organization works closely with healthcare providers to ensure seamless transitions from hospital to home and to support long-term health, independence, and dignity for its clients.

The decision to consolidate Professional Healthcare Staffing and AulTru under the Professional Home Health Services name reflects the organization's ongoing commitment to clarity and continuity for patients, partners, and the community. There are no changes to leadership, staffing, or the types of services provided.

"We're the same trusted team of more than 100 caregivers — simply moving forward under one name to better serve the people of Southern Nevada," Struck added.

About Professional Home Health Services

Locally owned and compassionately operated for more than 30 years, Professional Home Health Services (PHS) provides comprehensive in-home care to individuals and families across Southern Nevada. Services include skilled nursing, therapy, personal care, catastrophic care, and specialized programs for Veterans. PHS is an authorized VA Community Care Network provider and a trusted partner to hospitals, physicians, and community organizations. PHS is also a preferred provider of the CareScout Quality Network. The organization's mission is to deliver person-centered, professional in-home care that prioritizes clinical excellence, empathy, and respect — enhancing the health and dignity of every client it serves.
